## EXPERIENCE

**COMPANY** - RapidData Technologies

**ROLE** - Software Engineer

**Aug 2022 to Nov 2023**

## PROJECTS

### Marico Central

- **Technologies** : Mendix, Rest API
- **Duration** : Apr 2023 to Sep 2023
- **Role** : Developer
- **Overview** : This web Application serves as a maintenance tool for another Mario Application. Requests for additional Marco applications must be made using the Marco Central Application if users require them.

### Kuwait Oil Corporation

- **Technologies** : Mendix
- **Duration** : Sep 2023 to Oct 2023
- **Role** : Developer
- **Overview** : Developed a Mendix application for the effective management of oil well data. If an oil well requires maintenance, notify the drilling team so they can make the necessary repairs.

## PERSONAL PROJECTS

### FORUM Constructions & Services

- **Technologies** : React JS, RESTful API, CSS
- **Duration** : Dec2023 to Present
- **Role** : FontEnd Developer
- **Overview** : The primary goal of the Construction Site Management project is to efficiently monitor, and execute construction projects. The system is designed to maintain a comprehensive overview of all ongoing and upcoming projects while emphasizing the current project's progress.
